

Job Category

Field Services

Job Title:

Fiber Optic Technician

Summary/Description:

Field Service work for Virginia Beach-based fiber optic company. Work with a highly skilled team to provide on-site assistance for commercial and DOD projects. Field Services team members troubleshoot, terminate, splice and provide final system testing for a wide range of fiber optic applications from conventional to Blown Optical Fiber (BOF).

Education and Experience required:

Minimum high school diploma, associates degree or equivalent experience desirable. Must be fluent in MIL-STD 2042B, 2051, 2052, NSTM 505 and 408. Must have a working understanding of the EIA/TIA standards 514, 526 and 568. Must have 2 years of continuous fiber optic experience in shipboard and/or commercial fiber optics. Must have current ETA certifications and accredited Navy MIL-STD 2042 and NAVSEA standard 009-73 training. Must have a valid passport (required). Must have a valid drivers license and reliable transportation. Ability to pass criminal background check and drug screening. Ability to obtain or currently have a security clearance. Must be able to carry 40-60 pounds.

Key responsibilities:

Excellent communications skills.
Must be capable of handling a variety of responsibilities simultaneously while working under pressure or tight deadlines.
Must be skilled in fiber optic terminations (military and commercial connectors); testing and troubleshooting; system repair; fusion and mechanical splicing; fiber optic cable mapping; and fiber optic plant inspection.
Must be willing to travel in-conus and out-conus (position may require 60% travel)

Salary/Benefits:

Salary commensurate with experience. Excellent benefits include health, dental, vacation, sick leave, profit sharing, 401K, etc.

Submit resume to President and CEO of KITCO Fiber Optics via fax (757-518-9700) or email to employment@kitcofo.com.
