This sheet contains the technical data required by KITCO Fiber Optics and potential customers. Specific details such as images (not to scale), size, weight and content usages have been included.

PRODUCT NAME: LC Crimp Tool
APPLICATION: Fiber Optic Connector Termination
PART NUMBER 0700-1885
DIMENSIONS 9 5/8" x 3 1/4" x 1 3/16"

This ergonomic crimp tool features soft-rubber ergonomic handles, an angled head that prevents awkward wrist bending when crimping and less distance between handles for a more comfortable grip. It produces a higher crimp force with less exertion, with no breakover force needed to complete the crimp and comes complete with thumb screws that allow you change die sets quickly. This tool is equipped with a die so one can terminate the TAI-604-10 Pull Proof LC Connector onto fiber optic cable.
